

MEDIFAKT (FAKT) – Evidence based Healthcare Ecosystem

MEDIFAKT (FAKT), an enterprise-level Decentralized Healthcare Ecosystem, using a combination of Blockchain, the Internet of Things, and Machine Learning to enhance the security of the collected data through IoT devices and integrating them to a decentralized network.

MEDIFAKT(FAKT) aims to build a Cross-Chain Patient Data Aggregator with Identity Storage, authentication, and ownership. Our HIPAA compliant solution securely enables all modes of digital health communication, including telehealth, chat, voice and permission-based data sharing. The MEDIFAKT network gives custody of data to the Patients and create data interoperability, reduced operational costs, improved efficiencies and improved patient outcomes to the providers.
